

## PUBLICATIONS

Schlemermeyer, E., Schütte, M and Ammermüller, J. (1989) Immunohistochemical and electrophysiological evidence that locust ocellar photoreceptors contain and release histamine. *Neuroscience Letters* **99**, 73-78.

Schlemermeyer, E. and Chappell, R.L. (1991) Serotonin-like immunoreactivity reveals evidence for centrifugal fibers and a distinct class of amacrine cell in the skate retina. *Biological Bulletin* **181**: 327-328.

Schütte, M. and Schlemermeyer, E. (1993) Depolarization elicits, while hyperpolarization blocks uptake of endogenous glutamate by retinal horizontal cells of the turtle. *Cell and Tissue Research* **274**, 553-558.

Schlemermeyer, E. and Chappell, R.L. (1996) Two classes of bipolar cell in the retina of the skate, *Raja erinacea*. *Journal of Neurocytology* **25**: 625-635.

Schuette, E. and Chappell, R.L. (1998) Excitatory amino acids and serotonin uptake blockers reveal two physiologically distinct serotonin systems in the retina of the skate, *Raja erinacea*. *International Journal of Neuroscience* **95**:115-132.

Qian, H., H. Ripps, E. Schuette, and R.L. Chappell. (2001). Responses of small- and large-field bipolar cells to GABA and glycine. *Brain Research* **893**:273-277.

Chappell, R.L., E. Schuette, R. Anton and H. Ripps. (2002). GABA<sub>C</sub> receptors modulate the rod-driven ERG b-wave of the skate retina. *Documenta Ophthalmologica*. **105**(2):179-88.

## CONFERENCE PRESENTATIONS

Schlemermeyer, E., Schütte, M. and Ammermüller, J.. Extraocular photoreceptors in the pericellular epithelium of *Locusta migratoria*. *Soc.Neurosci.Abst.*, Vol. **15**, 1989.

Schlemermeyer, E., Schütte, M. and Ammermüller, J. Immunohistochemical and electrophysiological evidence that histamine is a photoreceptor transmitter in locust ocellar retina. *Invest. Ophthal. Vis. Sci.*, Vol. **30**, 1989.

Schlemermeyer, E. and Chappell, R.L. Glutamate and serotonin immunocytochemistry indicate centrifugal fibers and a visual streak in the skate retina. *Soc. Neurosci. Abstr.* **17**: 1375, 1991.

Schlemermeyer, E. and Chappell, R.L. Two classes of bipolar cell identified in the all-rod skate retina by PKC- and serotonin immunocytochemistry. *Invest. Ophthal. Vis. Sci.*, Vol. **32** :1264, 1991.

Schütte, M. and Schlemermeyer, E. Depolarization elicits, while hyperpolarization blocks uptake of endogenous glutamate in turtle horizontal cells. *Invest. Ophthal. Vis. Sci.*, Vol. **33**, 1992.

Chappell, R.L., Schlemermeyer, E. and Rosenstein, F. Evidence for parallel pathways in an all-rod retina. *FASEB summer research conferences*. 1994.

Schlemermeyer, E. and Chappell, R.L. Differential effects of excitatory amino acids, high K<sup>+</sup>, and an uptake blocker on the serotonergic system of the skate retina. *Invest. Ophthal. Vis. Sci.*, Vol. **35** :1361, 1994.

Schlemermeyer, E. and Chappell, R.L. A high affinity uptake blocker of serotonin enhances low affinity uptake of serotonin in the skate retina. *Invest. Ophthal. Vis. Sci.*, Vol. **36** :S290, 1995.

Chappell, R.L., Schlemermeyer, E. and Rosenstein, F. (1995) Evidence for parallel pathways in an all-rod retina. *Marine Eye Research Symp. Sarasota*.

Innocent, N., Schlemermeyer, E. and Chappell, R.L. A comparison of skate horizontal cell dissociation techniques. *National Minority Research Symp.* 1995.

Schlemermeyer, E. and Chappell, R.L. Immunocytopharmacology of the skate retina. *Marine Eye Research Symp. Sarasota*, 1996.

Anton, R.F., Casulo, C., Schuette, E. and Chappell, R.L. Development of a retinal slice preparation in the skate *Raja erinacea*. *National Minority Research Symp. New Orleans*, 1997.

Anton, R.F., Schuette, E. and Chappell, R.L. Evidence for a GABA<sub>C</sub>-dependent component of the skate (*Raja erinacea*) electroretinogram. *National Minority Research Symp. New York City*, G41, 133, 1998
